Subject: Monthly SA NPL call notes

My notes from the call today . **Rob/Victor see red highlight below**

Symposium

- HQ approval has taken a backseat to OSC readiness and Branch Chief meeting
- Need to finalize agenda based on topics from ASTSWMO (Kathy to send updated version for Regions for review at some point)
- Space and logistics still need to be worked out

FFRRO roadmap (not guidance) on PFOAs

- It was sent out to select individuals in the regions and at OSRTI for comment – due back on 5/17
- Contact Mary Cooke (FFRRO) if you want to see a draft copy
- If you have non-site specific comments you feel very strongly about you can send them to Mary (by end of the week)

NPL Proposal Comment Period

- Bob asked if Regions had received requests from PRPs (or others) for doc records and documentation. HQ is trying to anticipate if the nature of the comments they are likely to receive.
- Bob was interested if R8 had received anything – I didn't know. **Bob or Victor send him an email letting him know**
